New York City • Open to Remote Opportunities

WORK EXPERIENCE

Amount

Lead Software Engineer | New York, NY (Remote)

- Lead a team of 3 to 5 backend engineers responsible for delivering core platform features on time
- Architect scalable and high-performance solutions to satisfy business requirements within the scope of Amount's rapidly evolving white label credit origination platform
- Collaboratively led multiple key technology improvement initiatives, including the migration to using Temporal for workflow orchestration resulting in improved efficiency, visibility, and resiliency
- Serve as the SME for critical microservices written in Java and Go, taking ownership of their design, development, and ongoing enhancements
- Remain involved in hands-on development of these systems when possible

Senior Software Engineer | New York, NY (Remote)

Software Engineer | New York, NY (Remote)

- Backend web development using Java and Golang in a microservices architecture
